SCOTT MEINDERS, P.E. County Engineer

MARK T. JOHNSON, Maintenance
Superintendent

DOUG REISSETTER, Assistant to the Engineer

BECKY RITZERT, Office Manager

Engineer's Office

The Code of Iowa requires all counties to employ a licensed civil engineer known as the County Engineer. All construction and maintenance work on the county secondary roads is performed under the supervision of the County Engineer who is deemed responsible for the efficient, economical and good-faith performance of said work. It is the duty of the Board of Supervisors to establish policies and provide adequate funding in order to properly maintain the secondary road system. Additional guidance comes from the policies and safety standards developed by the Iowa Department of Transportation and the Federal Highway Administration.

The Winnebago County Engineer's Office is responsible for the planning, the design and the supervision of all construction and maintenance work performed on the secondary road system. Winnebago County's road system includes a total of 713 miles of roads. Of that total there are 148 miles that are paved. There are also approximately 92 bridges over 20 feet in length and numerous large culverts in the secondary road system.

The Engineer's Office is located in the lower level of the Courthouse.
